

The Horse's Skeleton: Workshops of 2017

This is a refreshingly interactive course, with the most comparative material you will find in South Africa. Don't miss out on this unique opportunity to see physically what your horse is all about.

(Attend all 4 courses and get to attend a fifth one free)

About the Presenter:

Helen Davies has the biggest collection of horse skeletons in the Southern Hemisphere, 65+ complete skeletons and counting. She uses them as part of the EQASA training program she offers.

Helen uses them as a visual aid to compare injuries across different disciplines at different ages.

The aim of the Skeleton courses is to arm you with the knowledge to prevent certain injuries and extend the life of your beloved horse or pony.
